

# Real-time shipment & asset monitoring

Track everything. Know everywhere. Act instantly

**STEPLogic Tracker is a flexible shipment visibility solution that captures and centralizes temperature, humidity, location, and asset tracking data across your supply chain.**

Built for industries where quality, compliance, and on-time delivery are critical, STEPLogic Tracker gives you end-to-end visibility from loading dock to delivery point—and beyond.

Whether you're moving vaccines or perishables, STEPLogic Tracker ensures your products arrive in optimal condition, with full traceability and actionable insights at every step.

## Who is it for?

### Pharmaceutical & life sciences

Ensure temperature-controlled medications, biologics, and vaccines are stored and delivered within spec. Maintain compliance with DSCSA and international cold chain guidelines.

### Food & Beverage distribution

Capture FSMA-compliant data for every handoff, location, and condition event. Reduce spoilage, speed recalls, and build brand trust.

### 3PLs & logistics providers

Offer customers unmatched supply chain transparency and control. Monitor shipments and assets across clients and carriers with one unified platform.

## Key features

### Real-time environmental monitoring

Continuously track temperature, humidity, and other environmental factors for cold chain and sensitive shipments.

### GPS location visibility

Gain full visibility into your shipment's location, route, and ETA with GPS-enabled tracking integrations.

### Reusable asset tracking

Monitor the status and movement of reusable containers, totes, pallets, and coolers—reduce loss, improve rotation.

### Excursion alerts and exception management

Get instant alerts when products fall outside acceptable thresholds. Trigger corrective workflows in real-time.

### System integration ready

Seamlessly integrate with your WMS, ERP, TMS, or manufacturing systems to link orders, shipments, and sensor data.

### Compliant and configurable

Built to support DSCSA, FSMA, and global serialization or food safety standards—with no-code personalization to fit your business.

## Why STEPLogic Tracker?

- Monitor environmental conditions and shipment status in one dashboard.
- Reduce loss and waste from damaged or mishandled shipments.
- Close visibility gaps between systems, carriers, and handoffs.
- Configure alerts, rules, and dashboards to match your business processes—no coding required.

**One platform. Every parameter.**  
**Total visibility.** That's STEPLogic Tracker.
